Public Notice of Application for Permit

KENAI FIELD OFFICE
Regulatory Division (1145)
CEPOA-RD
805 Frontage Road, Suite 200C
Kenai, Alaska 99611-7755

PUBLIC NOTICE DATE:	September 22, 2014
EXPIRATION DATE:	October 22, 2014
REFERENCE NUMBER:	POA-2011-13
WATERWAY:	Palmer Creek

Interested parties are hereby notified that a Department of the Army permit application has been received for work in waters of the United States as described below and shown on the enclosed project drawings.

Comments on the described work, with the reference number, should reach this office no later than the expiration date of this Public Notice to become part of the record and be considered in the decision. Please contact Andy Mitzel at (907) 283-3519, by fax at (907) 283-3981, or by email at andy.mitzel@usace.army.mil if further information is desired concerning this notice.

APPLICANT: Homer Bookkeepers, LLC, PO Box 2311, Homer, AK, 99603

AGENT: Ms. Aryn Young, Southern Exposures, LLC, PO Box 2311, Homer, AK, 99603

LOCATION: The project site is located within SW ¼ of the NE ¼ of Section 15, T. 6 S., R. 13 W., Seward Meridian; USGS Quad Map Seldovia C-4; Latitude 59.658413° N., Longitude 151.46521° W.; Tietjen Subdivision, Tract O-1, in Homer, Alaska.

PURPOSE: The applicant's stated purpose is to construct a commercial composting, vermiculture, landscaping product manufacturing facility and to provide commercial storage for equipment and machinery.

PROPOSED WORK: The applicant is proposing to discharge 2040 cubic yards (cy) of pit run gravel and 49 cy of concrete for the construction of a driveway, parking lot, composting facility, and drainage ditch in Waters of the U.S. All work would be performed in accordance with the enclosed plan (sheets 1-5), dated June 5, 2014.

ADDITIONAL INFORMATION: The applicant is proposing to construct a gravel pad which would be 1 foot deep, 300 feet wide, and 160 feet long underlain with tympar. The pad would require the placement of 1780 cy of clean pit run gravel permanently impacting 0.37 acres of Waters of the U.S. This area would be used for the construction of a 25 by 50 foot building, which would have 1 foot deep concrete foundation, and area for equipment storage.

The area shown as the "Commercial Compost/Agricultural Area" would be graded to allow for future activities. No material would be brought in for the development of the site. The only fill associated with this area would be generated from the grading of the site. This activity would impact 0.37 acres of Waters of the U.S. specifically, wetlands.

The wetland where the work would occur is classified as moderate value wetlands by the Homer Wetland Ranking. A wetland delineation was conducted, and the site was determined to be a mosaic of uplands and wetlands. The site consists of 33% wetlands, with the remainder being uplands.

APPLICANT PROPOSED MITIGATION: The applicant proposes the following mitigation measures to avoid, minimize, and compensate for impacts to waters of the United States from activities involving discharges of dredged or fill material.

a. Avoidance: The applicant's proposal would avoid half of the wetlands on the property by only using the northern half of the property. No impacts are proposed on the southern half of the property.

b. Minimization: The applicant has stated that minimization would occur by using only native material and maintaining vegetated cover to allow for water permeability on the commercial compost/agricultural area. This would allow for water infiltration in the area.

c. Compensatory Mitigation: The applicant is not proposing compensatory mitigation. The applicant has stated that: "Compensatory mitigation should not be required for these impacts since the wetland being disturbed is patchy, low-grade wetland and will not have significant loss of effectiveness due to the proposed project."

WATER QUALITY CERTIFICATION: A permit for the described work will not be issued until a certification or waiver of certification, as required under Section 401 of the Clean Water Act (Public Law 95-217), has been received from the Alaska Department of Environmental Conservation.

CULTURAL RESOURCES: The latest published version of the Alaska Heritage Resources Survey (AHRs) has been consulted for the presence or absence of historic properties, including those listed in or eligible for inclusion in the National Register of Historic Places. There are no listed or eligible properties in the vicinity of the worksite. Consultation of the AHRs constitutes the extent of cultural resource investigations by the District Commander at this time, and he is otherwise unaware of the presence of such resources. This application is being coordinated with the State Historic Preservation Office (SHPO). Any comments SHPO may have concerning presently unknown archeological or historic data that may be lost or destroyed by work under the requested permit will be considered in our final assessment of the described work.

ENDANGERED SPECIES: No threatened or endangered species are known to use the project area.

We have determined the described activity would have no effect on any listed or proposed threatened or endangered species, and would have no effect on any designated or proposed critical habitat, under the Endangered Species Act of 1973 (87 Stat. 844). Therefore, no consultation with the U.S. Fish and Wildlife Service or the National Marine Fisheries Service is required. However, any comments they may have concerning endangered or threatened wildlife or plants or their critical habitat will be considered in our final assessment of the described work.

ESSENTIAL FISH HABITAT: The Magnuson-Stevens Fishery Conservation and Management Act, as amended by the Sustainable Fisheries Act of 1996, requires all Federal agencies to consult with the NMFS on all actions, or proposed actions, permitted, funded, or undertaken by the agency, that may adversely affect Essential Fish Habitat (EFH). No EFH species are known to use the project area. We have determined the described activity would not adversely affect EFH in the project area.

TRIBAL CONSULTATION: The Alaska District fully supports tribal self-governance and government-to-government relations between Federally recognized Tribes and the Federal government. Tribes with protected rights or resources that could be significantly affected by a proposed Federal action (e.g., a permit decision) have the right to consult with the Alaska District on a government-to-government basis. Views of each Tribe regarding protected rights and resources will be accorded due consideration in this process. This Public Notice serves as notification to the Tribes within the area potentially affected by the proposed work and invites their participation in the Federal decision-making process regarding the protected Tribal right or resource. Consultation may be initiated by the affected Tribe upon written request to the District Commander during the public comment period.

PUBLIC HEARING: Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for public hearings shall state, with particularity, reasons for holding a public hearing.

EVALUATION: The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts of the proposed activity and its intended use on the public interest. Evaluation of the probable impacts, which the proposed activity may have on the public interest, requires a careful weighing of all the factors that become relevant in each particular case. The benefits, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. The outcome of the general balancing process would determine whether to authorize a proposal, and if so, the conditions under which it will be allowed to occur. The decision should reflect the national concern for both protection and utilization of important resources. All factors, which may be relevant to the proposal, must be considered including the cumulative effects thereof. Among those are conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership, and, in general, the needs and welfare of the people. For activities involving 404 discharges, a permit will be denied if the discharge that would be authorized by such permit would not comply with the Environmental Protection Agency's 404(b)(1) guidelines. Subject to the preceding sentence and any other applicable guidelines or criteria (see Sections 320.2 and 320.3), a permit will be granted unless the District Commander determines that it would be contrary to the public interest.

The Corps of Engineers is soliciting comments from the public; Federal, State, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

AUTHORITY: This permit will be issued or denied under the following authority:

(X) Discharge dredged or fill material into waters of the United States – Section 404 Clean Water Act (33 U.S.C. 1344). Therefore, our public interest review will consider the guidelines set forth under Section 404(b) of the Clean Water Act (40 CFR 230).

NOTICE OF APPLICATION FOR STATE WATER QUALITY CERTIFICATION

Any applicant for a federal license or permit to conduct an activity that might result in a discharge into navigable waters, in accordance with Section 401 of the Clean Water Act of 1977 (PL95-217), also must apply for and obtain certification from the Alaska Department of Environmental Conservation that the discharge will comply with the Clean Water Act, the Alaska Water Quality Standards, and other applicable State laws. By agreement between the U.S. Army Corps of Engineers and the Department of Environmental Conservation, application for a Department of the Army permit to discharge dredged or fill material into navigable waters under Section 404 of the Clean Water Act also may serve as application for State Water Quality Certification.

Notice is hereby given that the application for a Department of the Army Permit described in the Corps of Engineers' Public Notice No. **POA-2011-13, Palmer Creek**, serves as application for State Water Quality Certification from the Department of Environmental Conservation.

After reviewing the application, the Department may certify there is reasonable assurance the activity, and any discharge that might result, will comply with the Clean Water Act, the Alaska Water Quality Standards, and other applicable State laws. The Department also may deny or waive certification.

Any person desiring to comment on the project, with respect to Water Quality Certification, may submit written comments to the address above by the expiration date of the Corps of Engineer's Public Notice.
