¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: The review areas contain historically mined, previously disturbed areas with well drained course substrate. Hydric soils are not likely present and do not appear to indicate permafrost or perched water. No vegetation is present within this area. No signs of surface water or hydrology are apparent within the proposed impact area. Based on the best available data, the project area does not support the necessary factors that would indicate the presence of wetlands. Therefore, the subject property does not appear to contain waters of the U.S., including wetlands, under the Corps of Engineers (Corps) regulatory jurisdiction
