**\*\*\* APPLICATION WITHDRAWN \*\*\***

On January 28, 2022, the Alaska District Corps of Engineers published a Public Notice concerning an application received from the Alaska Department of Transportation and Public Facilities for a Department of the Army permit under Section 404 of the Clean Water Act (33 U.S.C. 1344) to excavate, within freshwater forested/shrub and emergent wetlands, a new 10- acre mining cell to a depth of 30 feet and 10 acres in area, to provide a source and stockpile area for aggregate gravel. The proposed new cell would be within an existing material site area. Waste rock and overburden material would be used to backfill the current or adjacent gravel mine cells or blocks. Mined areas regraded to final slopes would have overburden organic materials spread over the surfaces to aid in revegetation and seeded with native plant species. There is an existing access to the site at MP 390. The proposed work is scheduled to occur during the summer and fall construction seasons.

The project site is located within Latitude 69.8898° N., Longitude 148.7678° W.; Mile Post 390, east of the Dalton Highway, Alaska.

At the request of the applicant, the application has been withdrawn and the evaluation has been discontinued. Please bring this to the attention of all those interested in this application.

Please bring this announcement to the attention of anyone you know who is or may be interested. Please contact John Sargent at (907) 347-1801, or by email at [John.C.Sargent@usace.army.mil](mailto:John.C.Sargent@usace.army.mil) if further information is desired concerning this notice.
