**TIME EXTENSION OF EXPIRATION OF REGIONAL GENERAL PERMITS (RGPs)  
POA-1993-00010-M4, Residential Development,  
POA-1993-00011-M4, Linear Infrastructure Development, and  
POA-1993-00012-M4, Commercial, Institutional and Community Development**

The United States (U.S.) Army Corps of Engineers (Corps), Alaska District, in accordance with regulations pursuant to Section 404 of the Clean Water Act (Public Law 95-217, 33 U.S.C. 1344 et. Seq.) is extending the date of expiration of the three RGPs referenced above. These RGPs will expire on April 30, 2021.

These RGPs are specific to the authorization of the discharge of dredged or fill material for residential, commercial, institutional, community, and linear infrastructure purposes into certain wetlands within the Municipality of Anchorage (MOA), Alaska. To view the RGPs, their terms and conditions, visit: <https://www.poa.usace.army.mil/Missions/Regulatory/Special-Public-Notices/>.

This six month time extension for the use of these RGPs is being issued to maintain continuity of authorization for those permittees operating under one or more of these RGPs, while the Corps completes the environmental and procedural evaluation for their potential reissuances.

The Corps anticipates deciding whether to reissue the RGPs no later than April 30, 2021. If the Corps chooses to reissue the RGPs, a Special Public Notice to solicit public and agency comment on the proposed reissuances will be published in advance of April 30, 2021. Should these RGPs be reissued, their current versions would be superseded by the revised RGPs on the date of reissuance.
