

EFH Mapper Report

EFH Data Notice

Essential Fish Habitat (EFH) is defined by textual descriptions contained in the fishery management plans developed by the regional fishery management councils. In most cases mapping data can not fully represent the complexity of the habitats that make up EFH. This report should be used for general interest queries only and should not be interpreted as a definitive evaluation of EFH at this location. A location-specific evaluation of EFH for any official purposes must be performed by a regional expert. Please refer to the following links for the appropriate regional resources.

Query Results

Degrees, Minutes, Seconds: Latitude = 59° 36' 44" N, Longitude = 152° 34' 26" W

Decimal Degrees: Latitude = 59.612, Longitude = -151.426

The query location intersects with spatial data representing EFH and/or HAPCs for the following species/management units.
