User Note: Plant species not listed on the NWPL will most likely have an UPL indicator. However, prior to making this assumption, users should first check for synonyms on the NWPL, wetland indicator status ratings for the species within adjacent regions, and/or scientific literature.

BACKGROUND

Since 2006, the U.S. Army Corps of Engineers (USACE) has administered the National Wetland Plant List (NWPL) for the United States (U.S.) and its territories. Wetland delineations conducted under the authority of Section 404 of the Clean Water Act (33 U.S.C. 1344) and Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 401 et seq.) and wetland determinations conducted under the authority of the Food Security Act of 1985 (16 U.S.C. 3801 et seq.) are identified using the three-factor approach- 1) hydrophytic vegetation, 2) hydric soils, and 3) wetland hydrology. The NWPL informs the hydrophytic vegetation factor by providing wetland indicator status ratings for plant species, which indicates a plant species' estimated frequency of occurrence in wetlands or non-wetlands. Table 1 provides the definitions of each of those wetland indicator status ratings used on the NWPL. Table 2 provide the number of species for each wetland indicator status rating within the region.

Table 1. Wetland indicator status ratings used in the NWPL.²

Wetland Indicator Status Rating	Definition
Obligate (OBL)	Almost always occur in wetlands
Facultative Wetland (FACW)	Usually occur in wetlands, but may occur in non-wetlands
Facultative (FAC)	Occur in wetlands and non-wetlands
Facultative Upland (FACU)	Usually occur in non-wetlands, but may occur in wetlands
Upland (UPL)	Almost never occur in wetlands

SUBREGION(S)

The NWPL utilizes the same regional boundaries as the Regional Supplements to the Corps of Engineers Wetland Delineation Manual. The Alaska Region contains thirteen subregions (Figure 1). Within these subregions, eight plant species have different wetland indicator status ratings than the rest of the region (Table 2).

CHANGES SINCE LAST UPDATE

As part of the most recent update to the NWPL, there were **no** changes to the wetland indicator status ratings for the Alaska Region.
