Vor wetlands were assessed within the review area and determined to be not jurisdictional. Explain:

1. Characteristics of non-TNWs that flow directly or indirectly into TNW

(i) General Area Conditions: Watershed size: Drainage area:

Average annual rainfall: inches Average annual snowfall: inches

(ii) Physical Characteristics (a) Relationship with TNW:

Tributary flows directly into TNW. Tributary flows through [] tributaries before entering TNW.

Project waters are river miles from TNW. Project waters are river miles from RPW. Project Waters are aerial (straight) miles from TNW. Project waters are aerial(straight) miles from RPW.

Project waters cross or serve as state boundaries. Explain:

Identify flow route to TNW:5

Tributary Stream Order, if known:

 Order
 Tributary Name

 2
 POA-2011-0175 Segment 6 stream

(b) General Tributary Characteristics:

Tributary is:										
Tributary Name	Natural	Artificial	Explain	Manipulated	Explain					
POA-2011-0175 Segment 6 stream	Х	-	-	-	-					

Tributary properties with respect to top of bank (estimate):

Tributary Name	Width (ft)	Depth (ft)	Side Slopes
POA-2011-0175 Segment 6 stream	2	.5	-

Primary tributary substrate composition:

Tributary Name	Silt	Sands	Concrete	Cobble	Gravel	Muck	Bedrock	Vegetation	Other
POA-2011-0175 Segment 6 stream	-	-	-	Х	-	Х	-	-	-

Tributary (conditions, stability, presence, geometry, gradient):

Tributary Name	Condition\Stability	Run\Riffle\Pool Complexes	G
POA-2011-0175 Segment 6 stream	Upper perennial streams have formed at the outlet of the wetland. They are all unnamed, and tributaries to Coho Creek. The width of the streams vary seasonally, the beds are comprised of organic and small cobble material	No presence of run/riffle/pool complexes. Also, the stream is not a catalogued fish stream.	Rel stra

(c) Flow:

Tributary Name	Provides for	Events Per Year	Flow Regime	Duration & Volume
POA-2011-0175 Segment 6 stream	Perennial flow	-	-	-

Surface Flow is:

Tributary Name	Surface Flow	Characteristics
POA-2011-0175 Segment 6 stream	-	-

Subsurface Flow:

Tributary Name	Subsurface Flow	Explain Findings	Dye (or other) Test
POA-2011-0175 Segment 6 stream	-	-	-

Tributary has:

Tributary Name	Bed & Banks	онwм	Discontinuous OHWM ⁷	Explain
POA-2011-0175 Segment 6 stream	Х	Х	-	-

Tributaries with OHWM⁶ - (as indicated above)

Tributary Name	онwм	Clear	Litter	Changes in Soil	Destruction Vegetation	Shelving	Wrack Line	Matted\Absent Vegetation	Sediment Sorting	Leaf Litter	Scour	Sediment Deposition	Flow Events	Wa Stai
POA-2011-0175 Segment 6 stream	х	х	-	-	-	-	-	-	-	-	-	-	-	

If factors other than the OHWM were used to determine lateral extent of CWA jurisdiction:

High Tide Line indicated by: Not Applicable.

Mean High Water Mark indicated by: Not Applicable.

(iii) Chemical Characteristics:

https://orm.usace.army.mil/orm2/f?p=106:34:100470478536164... 2/15/2013

 Characterize tributary (e.g., water color is clear, discolored, oily film; water quality;general watershed characteristics, etc.).

 Tributary Name
 Explain
 Identify specific pollutants, if known

 POA-2011-0175 Segment 6 stream
 Medium water velocity and tanic color properties.
 No known pollutants.

(iv) Biological Characteristics. Channel supports:

Tributary Name	Riparian Corridor	Characteristics	Wetland Fringe	Characteristics	Habitat
POA-2011-0175 Segment 6 stream	-	-	-	-	Х

Habitat for: (as indicated above)

Tributary Name	Habitat	Federally Listed Species	Explain Findings	Fish\Spawn Areas	Explain Findings	Other Environmentally Sensitive Species	Explain Findings	Aquatic\Wildlife Diversity	
POA-2011-0175 Segment 6 stream	x	-	-	-	-	-		х	The area black-tail furbeare species

2. Characteristics of wetlands adjacent to non-TNW that flow directly or indirectly into TNW

(i) Physical Characteristics: (a) General Wetland Characteristics: Properties: Not Applicable.

(b) General Flow Relationship with Non-TNW:

Flow is: Not Applicable.

Surface flow is: Not Applicable.

Subsurface flow: Not Applicable.

(c) Wetland Adjacency Determination with Non-TNW: Not Applicable.

(d) Proximity (Relationship) to TNW: Not Applicable.

(ii) Chemical Characteristics: Characterize tributary (e.g., water color is clear, discolored, oily film; water quality; general watershed characteristics, etc.). Not Applicable.

(iii) Biological Characteristics. Wetland supports: Not Applicable.

3. Characteristics of all wetlands adjacent to the tributary (if any):

All wetlands being considered in the cumulative analysis: Not Applicable.

Summarize overall biological, chemical and physical functions being performed: Not Applicable.

C. SIGNIFICANT NEXUS DETERMINATION

A significant nexus analysis will assess the flow characteristics and functions of the tributary itself and the functions performed by any wetlands adjacent to the tributary to determine if they sign chemical, physical, and biological integrity of a TNW. For each of the following situations, a significant nexus exists if the tributary, in combination with all of its adjacent wetlands, has more thar insubstantial effect on the chemical, physical and/or biological integrity of a TNW. Considerations when evaluating significant nexus include, but are not limited to the volume, duration, and freq in the tributary and its roximity to a TNW. And the functions performed by the tributary and all its adjacent wetlands. It is not appropriate to determine significant nexus based solely on any spec (e.g. between a tributary and its adjacent wetland or between a tributary and the TNW). Similarly, the fact an adjacent wetland lies within or outside of a floodplain is not solely determinative of significant terms.

Significant Nexus: Not Applicable

D. DETERMINATIONS OF JURISDICTIONAL FINDINGS. THE SUBJECT WATERS/WETLANDS ARE:

1. TNWs and Adjacent Wetlands:

Not Applicable.

2. RPWs that flow directly or indirectly into TNWs:

Wetland Name	Flow	Explain
POA-2011-0175 Segment 6 stream	PERENNIAL	The perennial stream is un-named and flows into Coho Creek. Coho Creek flows into Port Fredrick, a traditional and navigable water subject to ebb and fl

Provide estimates for jurisdictional waters in the review area:

Wetland Name	Туре	Size (Linear) (m)	Size (Area) (m ²)
POA-2011-0175 Segment 6 stream	Relatively Permanent Waters (RPWs) that flow directly or indirectly into TNWs	13.716	-
Total:		13.716	0

3. Non-RPWs that flow directly or indirectly into TNWs:⁸ Not Applicable.

https://orm.usace.army.mil/orm2/f?p=106:34:100470478536164... 2/15/2013

ORM Printer Friendly JD Form

Provide estimates for jurisdictional waters in the review area:

Not Applicable.

4. Wetlands directly abutting an RPW that flow directly or indirectly into TNWs. Not Applicable.

Provide acreage estimates for jurisdictional wetlands in the review area: Not Applicabl

5. Wetlands adjacent to but not directly abutting an RPW that flow directly or indirectly into TNWs: Not Applicable

Provide acreage estimates for jurisdictional wetlands in the review area: Not Applicable.

6. Wetlands adjacent to non-RPWs that flow directly or indirectly into TNWs: Not Applicable

Provide estimates for jurisdictional wetlands in the review area: Not Applicable.

7. Impoundments of jurisdictional waters:⁹ Not Applicable.

E. ISOLATED [INTERSTATE OR INTRA-STATE] WATERS INCLUDING ISOLATED WETLANDS, THE USE, DEGRADATION OR DESTRUCTION OF WHICH COULD AFFECT INTERSTATE COMMERCE, WATERS:10 Not Applicable

Identify water body and summarize rationale supporting determination: Not Applicable

Provide estimates for jurisdictional waters in the review area: Not Applicable

F. NON-JURISDICTIONAL WATERS. INCLUDING WETLANDS

If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers Wetland Delineation Manual and/or appropriate Regional Supplements:

Review area included isolated waters with no substantial nexus to interstate (or foreign) commerce:

Prior to the Jan 2001 Supreme Court decision in "SWANCC," the review area would have been regulated based soley on the "Migratory Bird Rule" (MBR):

Waters do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction (Explain):

Other (Explain):

Provide acreage estimates for non-jurisdictional waters in the review area, where the sole potential basis of jurisdiction is the MBR factors (ie., presence of migratory birds, presence of endangere irrigated agriculture), using best professional judgment: Not Applicable.

Provide acreage estimates for non-jurisdictional waters in the review area, that do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction. Not Applicable

SECTION IV: DATA SOURCES.

A. SUPPORTING DATA. Data reviewed for JD (listed items shall be included in case file and, where checked and requested, appropriately reference below): Not Applicable.

B. ADDITIONAL COMMENTS TO SUPPORT JD: Not Applicable.

1-Boxes checked below shall be supported by completing the appropriate sections in Section III below

²-For purposes of this form, an RPW is defined as a tributary that is not a TNW and that typically flows year-round or has continuous flow at least "seasonally" (e.g., typically 3 months).

³-Supporting documentation is presented in Section III.F.

4-Note that the Instructional Guidebook contains additional information regarding swales, ditches, washes, and erosional features generally and in the arid West.

⁵-Flow route can be described by identifying, e.g., tributary a, which flows through the review area, to flow into tributary b, which then flows into TNW.

⁶-A natural or man-made discontinuity in the OHWM does not necessarily sever jurisdiction (e.g., where the stream temporarily flows underground, or where the OHWM has been removed by development or agricultural practices). Where there is a breat the waterbody's flow regime (e.g., flow over a rock outcrop or through a culvert), the agencies will look for indicators of flow above and below the break. 7_{-lbid.}

8-See Footnote #3.

⁹ -To complete the analysis refer to the key in Section III.D.6 of the Instructional Guidebook

10-Prior to asserting or declining CWA jurisdiction based solely on this category, Corps Districts will elevate the action to Corps and EPA HQ for review consistent with the process described in the Corps/EPA Memorandum Regarding CWA Act Jurisdicti
