**B. ADDITIONAL COMMENTS TO SUPPORT JD:** The applicant requested a JD for two house sites located in Venetie, Alaska. Technical information about natural resources in this area is sparse, also there are no property parcels or lines in Venetie. USGS map shows that housing sites are in a flat area adjacent to the Teedriinjik (formerly known as Chandalar) River. Aerial photo show an expanse of open canopy, white spruce trees (*Picea glauca*, FACU). Site photos also show quaking aspen (*Populus tremuloides*, FACU). The applicant stated that the sites are located on a slight rise with well drained, gravel soils, as ascertained and selected by the elders in the village. Site is uplands as vegetation, soils and hydrology do not satisfy wetland criteria; a DA permit will not be required.
