<sup>1</sup> This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

**B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:** Vegetation on the parcel appears to be predominantly FAC & FACU species. Elevation profiles of the parcel indicate that water likely drains to the east and south and does not collect on the parcel. Based on these observations, the vegetation, soils, and hydrology of the parcel do not support the presence of wetland indicators. Therefore, the entirety of the 1.65-acre parcel is located in uplands.
