B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: Project area is located adjacent to parcels that were delineated based off the NWI and field checked by Travis Peterson Environmental Consulting, Inc. on September 3, 2019, for project number POA-2019-00544. USACE concurred with the findings of the Travis Peterson Environmental Consulting, Inc. delineation report on September 30, 2019. Based on the similarity between the parcels, the provided delineation report for the adjacent parcels has been deemed applicable to the project parcel. The Travis Peterson Environmental Consulting, Inc. delineation report indicates the adjacent parcels do not have indicators to support the presence of wetlands.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

Additionally, no ponding, depressions, or water is visible in aerial imagery across multiple years on the project parcel. Therefore, the entirety of the parcel is considered uplands.
