<sup>1</sup> This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

**B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:** The lack of hydric soils, vegetation and hydrology indicate that the area under consideration does not contain waters of the U.S., including wetlands, based on this desktop delineation. The area does not include a hydrological connection to the adjacent North Fork Cr.. Vegetation includes facultative upland species such as Cottonwood (*Populus balsamifera*) and Paper Birch (*Betula neolaskana*). Historic mining occurred within this area since at least 1952, converting potential wetlands into uplands.
