<sup>1</sup> This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

**B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:** A site visit conducted on May 25, 2023, showed that there are no indicators of an Ordinary High-Water Mark (OHWM) and no bed or bank to suggest a creek, or any other aquatic resource is present on or near the property, under normal circumstances. Ground water is being pumped and released at the surface, resulting in an artificial pond. There are also no indicators that there are wetlands on or near the property of question. After analyzing desktop resources, referring to a previous jurisdictional determination, and conducting a site visit, it has been determined that there are no Waters of the U.S. (WOTUS) in the area of the question that would fall under the Corps of Engineers jurisdiction.
