## APPROVED JURISDICTIONAL DETERMINATION FORM U.S. Army Corps of Engineers

	U.S. Army Corps of Engineers
SECTION I: BACKGROUND INFORMAT	TION
A. REPORT COMPLETION DATE FOR APPRO	DVED JURISDICTIONAL DETERMINATION (JD): 18-Jan-2013
B. DISTRICT OFFICE, FILE NAME, AND NUM	BER: Alaska District POA-2012-00723-ID1
C. PROJECT LOCATION AND BACKGROUNI	
C. PROJECT LOCATION AND BACKGROOM	
State :	AK - Alaska
County/parish/borough:	Matanuska-Susitna
City:	Wasilla
Lat:	61.60264
Long:	-149.67498
Universal Transverse Mercator	Folder UTM List
	UTM list determined by folder location
	NAD83 / UTM zone 6N
	Waters UTM List
	UTM list determined by waters location
	NAD83 / UTM zone 6N
Name of nearest waterbody:	Seymour Lake
Name of nearest Traditional Navigable Wate Name of watershed or Hydrologic Unit Code	
Check if map/diagram of review area and/	or potential jurisdictional areas is/are available upon request.
	sites, disposal sites, etc.) are associated with the action and are recorded on a different JD form.
D. REVIEW PERFORMED FOR SITE EVALUA	
Field Determination Date(s): 06-Sep-	2012
OF OTHER HEADY OF FINDINGS	,
SECTION II: SUMMARY OF FINDINGS	
A. RHA SECTION 10 DETERMINATION OF JU	JRISDICTION
There "navigable waters of the U.S." within Riv	ers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area.
Waters subject to the ebb and flo	uu of tha tida
Waters are presently used, or have	we been used in the past, or may be susceptible for use to transport interstate or foreign commerce.
Explain:	
B. CWA SECTION 404 DETERMINATION OF	JURISDICTION.
There "waters of the U.S." within Clean Water	Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area.
	,
1. Waters of the U.S.	1
a. Indicate presence of waters of U.S. in review	
Water Name	Water Type(s) Present
POA-2012-723; Seymour L., James Sellens	Netlands directly abutting RPWs that flow directly or indirectly into TNWs
b. Identify (estimate) size of waters of the U.S.	in the review area:
Area: (m²) Linear: (m)	
c. Limits (boundaries) of jurisdiction:	
based on: 1987 Delineation Manual.	
OHWM Elevation: (if known)	
2. Non-regulated waters/wetlands: <sup>3</sup>	
Potentially jurisdictional waters and/or wetlan	ds were assessed within the review area and determined to be not jurisdictional. Explain:
·	Λ.
SECTION III: CWA ANALYSIS	
A. TNWs AND WETLANDS ADJACENT TO TI	NWs
<b>1.TNW</b> Not Applicable.	
тот, фрисало.	
2. Wetland Adjacent to TNW Not Applicable.	
пот другоаме.	
B. CHARACTERISTICS OF TRIBUTARY (THAT	IS NOT A TNW) AND ITS ADJACENT WETLANDS (IF ANY):
1. Characteristics of non-TNWs that flow direc	tty or indirectly into TNW
(i) General Area Conditions:	• • • • •
Watershed size:	
Drainage area:	
Drainage area:  Average annual rainfall: inches  Average annual snowfall: inches	

# (ii) Physical Characteristics (a) Relationship with TNW:

Tributary flows directly into TNW.

Tributary flows through [] tributaries before entering TNW.

:Number of tributaries

Project waters are river miles from TNW.

Project waters are river miles from RPW.

Project Waters are aerial (straight) miles from TNW.

Project waters are aerial(straight) miles from RPW.

Project waters cross or serve as state boundaries. Explain:

Identify flow route to TNW:5

# Tributary Stream Order, if known: Not Applicable.

#### (b) General Tributary Characteristics:

Tributary is: Not Applicable.

## Tributary properties with respect to top of bank (estimate): Not Applicable.

#### Primary tributary substrate composition:

# Tributary (conditions, stability, presence, geometry, gradient): Not Applicable.

(c) Flow: Not Applicable.

#### Surface Flow is:

Not Applicable.

# Subsurface Flow: Not Applicable.

# Tributary has: Not Applicable.

## If factors other than the OHWM were used to determine lateral extent of CWA jurisdiction:

## High Tide Line indicated by:

Not Applicable.

# Mean High Water Mark indicated by: Not Applicable.

(iii) Chemical Characteristics:
Characterize tributary (e.g., water color is clear, discolored, oily film; water quality;general watershed characteristics, etc.).

## (iv) Biological Characteristics. Channel supports: Not Applicable.

#### 2. Characteristics of wetlands adjacent to non-TNW that flow directly or indirectly into TNW

(i) Physical Characteristics: (a) General Wetland Characteristics: Properties:

Wetland Name	Size (Acres)	Wetland Type	Wetland Quality	Cross or Serve as State Boundaries. Explain
POA-2012-723; Seymour L., James Sellens	0	Palustrine	Light levels of contaminat inputs due to low level of development in the area.	No.

# (b) General Flow Relationship with Non-TNW: Flow is:

Wetland Name	Flow	Explain
POA-2012-723; Seymour L., James Sellens	Perennial flow.	-

## Surface flow is:

Wetland Name	Flow	Characteristics
POA-2012-723; Seymour L., James Sellens	Overland sheetflow	-

#### Subsurface flow:

Wetland Name	Subsurface Flow	Explain Findings	Dye (or other) Test
POA-2012-723; Seymour L., James Sellens	Yes	Groundwater bidirectional flow.	-

(c) Wetland Adjacency Determination with Non-TNW:

wetiand Adjacency Determination with Non-TNW:							
		Discrete Wetland		Separated by			

Wetland Name	Directly Abutting	Hydrologic Connection	<b>Ecological Connection</b>	Berm/Barrier
POA-2012-723; Seymour L., James Sellens	Yes	-	-	-

#### (d) Proximity (Relationship) to TNW:

Wetland Name		Aerial Miles From TNW	Flow Direction	Within Floodplain	
POA-2012-723; Seymour L., James Sellens	1 (or less)	1 (or less)	Wetland to/from navigable waters	2-year or less	

(ii) Chemical Characteristics:
Characterize tributary (e.g., water color is clear, discolored, oily film; water quality; general watershed characteristics, etc.).

Wetland Name	Explain	Identify specific pollutants, if known
POA-2012-723; Seymour L., James Sellens	-	Llkely oils from driveways, boat use, etc.

#### (iii) Biological Characteristics. Wetland supports:

Wetland Name	Riparian Buffer	Characteristics	Vegetation	Explain
POA-2012-723; Seymour L., James Sellens	-	-	-	-

#### Habitat for:

Wetland Name	Habitat	Federally Listed Species	Explain Findings	Spawn Area	Explain Findings	Other Environmentally Sensitive Species	Explain Findings	Aquatic\Wildlife Diversity	Explain Findings
POA-2012-723; Seymour L., James Sellens	x	-	-	x	-	X	-	x	-

#### 3. Characteristics of all wetlands adjacent to the tributary (if any):

All wetlands being considered in the cumulative analysis: Not Applicable.

Summarize overall biological, chemical and physical functions being performed:

Not Applicable.

#### C. SIGNIFICANT NEXUS DETERMINATION

A significant nexus analysis will assess the flow characteristics and functions of the tributary itself and the functions performed by any wetlands adjacent to the tributary to determine if they A significant nexus analysis will assess the flow characteristics and functions of the tributary ised and the functions performed by any wetlands adjacent to the tributary to determine ir significantly affect the chemical, physical, and biological integrity of a TNW. For each of the following situations, a significant nexus exists if the tributary, in combination with all of its adjacent wetlands, has more than a speculative or insubstantial effect on the chemical, physical and/or biological integrity of a TNW. Considerations when evaluating significant nexus include, but are not limited to the volume, duration, and frequency of the flow of water in the tributary and its proximity to a TNW, and the functions performed by the tributary and all its adjacent wetlands. It is not appropriate to determine significant nexus based solely on any specific threshold of distance (e.g. between a tributary and its adjacent wetland lies within or outside of a floodplain is not solely determinative of significant nexus.

## Significant Nexus: Not Applicable

D. DETERMINATIONS OF JURISDICTIONAL FINDINGS. THE SUBJECT WATERS/WETLANDS ARE:

#### 1. TNWs and Adjacent Wetlands:

#### 2. RPWs that flow directly or indirectly into TNWs:

Provide estimates for jurisdictional waters in the review area:

Not Applicable.

3. Non-RPWs that flow directly or indirectly into TNWs:8

Not Applicable

Provide estimates for jurisdictional waters in the review area:

Not Applicable.

### 4. Wetlands directly abutting an RPW that flow directly or indirectly into TNWs.

Wetland Name	Flow	Explain
POA-2012-723; Seymour L., James Sellens	PERENNIAL	Abutting wetlands to Seymour Lake.

### Provide acreage estimates for jurisdictional wetlands in the review area:

Wetland Name	Туре	Size (Linear) (m)	Size (Area) (m <sup>2</sup> )
POA-2012-723; Seymour L., James Sellens	Wetlands directly abutting RPWs that flow directly or indirectly into TNWs	-	16.187424
Total:		0	16.187424

### 5. Wetlands adjacent to but not directly abutting an RPW that flow directly or indirectly into TNWs:

Not Applicable

Provide acreage estimates for jurisdictional wetlands in the review area:

#### 6. Wetlands adjacent to non-RPWs that flow directly or indirectly into TNWs:

Not Applicable.

Provide estimates for jurisdictional wetlands in the review area:

Not Applicable.

7. Impoundments of jurisdictional waters:<sup>9</sup>
Not Applicable.

E. ISOLATED [INTERSTATE OR INTRA-STATE] WATERS INCLUDING ISOLATED WETLANDS, THE USE, DEGRADATION OR DESTRUCTION OF WHICH COULD AFFECT INTERSTATE COMMERCE, INCLUDING ANY SUCH WATERS: 10

Identify water body and summarize rationale supporting determination: Not Applicable.

Provide estimates for jurisdictional waters in the review area:

Not Applicable.

- If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers Wetland Delineation Manual and/or appropriate Regional Supplements:
- Review area included isolated waters with no substantial nexus to interstate (or foreign) commerce:
- Prior to the Jan 2001 Supreme Court decision in "SWANCC," the review area would have been regulated based soley on the "Migratory Bird Rule" (MBR):
- Waters do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction (Explain):

Other (Explain):

Provide acreage estimates for non-jurisdictional waters in the review area, where the sole potential basis of jurisdiction is the MBR factors (ie., presence of migratory birds, presence of endangered species, use of water for irrigated agriculture), using best professional judgment:

Not Applicable.

Provide acreage estimates for non-jurisdictional waters in the review area, that do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction.

#### 

## B. ADDITIONAL COMMENTS TO SUPPORT JD:

Not Applicable.

<sup>1-</sup>Boxes checked below shall be supported by completing the appropriate sections in Section III below.

<sup>2-</sup>For purposes of this form, an RPW is defined as a tributary that is not a TNW and that typically flows year-round or has continuous flow at least "seasonally" (e.g., typically 3 months).

<sup>3-</sup>Supporting documentation is presented in Section III.F.

<sup>4-</sup>Note that the Instructional Guidebook contains additional information regarding swales, ditches, washes, and erosional features generally and in the arid West.

<sup>5-</sup>Flow route can be described by identifying, e.g., tributary a, which flows through the review area, to flow into tributary b, which then flows into TNW.

<sup>6.</sup> A natural or man-made discontinuity in the OHWM does not necessarily sever jurisdiction (e.g., where the stream temporarily flows underground, or where the OHWM has been removed by development or agricultural practices). Where there is a break in the OHWM that is unrelated to the waterbody's flow regime (e.g., flow over a rock outcrop or through a culvert), the agencies will look for indicators of flow above and below the break.

7. Ibid.

<sup>8-</sup>See Footnote #3.

<sup>9 -</sup>To complete the analysis refer to the key in Section III.D.6 of the Instructional Guidebook.

<sup>10</sup>\_Prior to asserting or declining CWA jurisdiction based solely on this category, Corps Districts will elevate the action to Corps and EPA HQ for review consistent with the process described in the Corps/EPA Memorandum Regarding CWA Act Jurisdiction Following Rapanos.
