Public Notice of Application for Permit

KENAI FIELD OFFICE
Regulatory Division (1145)
CEPOA-RD
44669 Sterling Highway, Suite B
Soldotna, Alaska 99669

| | |
|----------------------------|----------------------------|
| PUBLIC NOTICE DATE: | January 28, 2015 |
| EXPIRATION DATE: | February 27, 2015 |
| REFERENCE NUMBER: | POA-2007-870 |
| WATERWAY: | Near Island Channel |

Interested parties are hereby notified that a Department of the Army permit application has been received for work in waters of the United States as described below and shown on the enclosed project drawings.

Comments on the described work, with the reference number, should reach this office no later than the expiration date of this Public Notice to become part of the record and be considered in the decision. Please contact Michael Setering at (907) 252-3770, or by email at Michael.t.setering@usace.army.mil if further information is desired concerning this notice.

APPLICANT: Trident Seafoods Corporation (Mr. Kurt Esveldt)

LOCATION: The project site is located within Section 32, Township 27 S., Range 19 W., Seward Meridian; USGS Quad Map AK-Kodiak D-2; Latitude 57.7890° N., Longitude -152.3975° W.; in Kodiak, Alaska.

PURPOSE: The applicant's stated purpose is to perform dredging operations at the Trident Seafoods dock in Kodiak to accommodate safe vessel movements along the existing dock face.

PROPOSED WORK: The applicant would dredge 1,350 cubic yards of material (primarily bedrock) from an area 25-ft in width by 225-ft in length to an average depth of 5-ft, located immediately in front of the existing dock. Work would be completed over a five-day period, utilizing a low-impact hydraulic Xentric Ripping head on a LS 800 barge-mounted excavator. Dredge material would be excavated and placed on a split hull dump barge or flat deck barge, and would dewater naturally in-transit to the dredge disposal site, located in St. Herman Bay, approximately 1-mile from the project area (see enclosure). The material barge would be pushed by a tugboat en-route to the dredge disposal site; upon arrival at the dredge disposal site, material would either be dumped (if using the split hull dump barge) or mechanically removed with clamshell excavator (if using the flat deck barge).

The limits of disposal would be precisely identified by Global Positioning Systems. The City of Kodiak and the Kodiak Harbormaster Office would be notified prior to commencement of disposal activities. All work would be performed in accordance with the enclosed plan (sheets 1-7), dated January 21, 2015.

ADDITIONAL INFORMATION: The proposed disposal site was previously identified and utilized as part of the 2013 U.S. Army Corps of Engineers maintenance dredging project in St. Herman and St. Paul Harbors, in partnership with the City of Kodiak.

APPLICANT PROPOSED MITIGATION: The applicant proposes the following mitigation measures to avoid, minimize, and compensate for impacts to waters of the United States from activities involving discharges of dredged or fill material.

a. Avoidance: ***The U.S. Army Corps of Engineers is working with the applicant to develop their avoidance statement consistent with 33 CFR Part 325.1(d)(7) for our review and evaluation, prior to reaching a permit decision***

b. Minimization: ***The U.S. Army Corps of Engineers is working with the applicant to develop their minimization statement consistent with 33 CFR Part 325.1(d)(7) for our review and evaluation, prior to reaching a permit decision***

c. Compensatory Mitigation: The applicant has indicated they do not anticipate a compensatory mitigation requirement for the in-water disposal of dredged material.

WATER QUALITY CERTIFICATION: A permit for the described work will not be issued until a certification or waiver of certification, as required under Section 401 of the Clean Water Act (Public Law 95-217), has been received from the Alaska Department of Environmental Conservation.

CULTURAL RESOURCES: The latest published version of the Alaska Heritage Resources Survey (AHRs) has been consulted for the presence or absence of historic properties, including those listed in or eligible for inclusion in the National Register of Historic Places. There are no listed or eligible properties in the vicinity of the worksite. Consultation of the AHRs constitutes the extent of cultural resource investigations by the District Commander at this time, and he is otherwise unaware of the presence of such resources. This application is being coordinated with the State Historic Preservation Office (SHPO). Any comments SHPO may have concerning presently unknown archeological or historic data that may be lost or destroyed by work under the requested permit will be considered in our final assessment of the described work.

THREATENED (T) or ENDANGERED SPECIES (E): The project area is within the known or historic range of the (T) Northern Sea Otter (*Enhydra lutris kenyoni*), (E) Steller Sea Lion (*Eumatopia jubatus*), (E) Humpback whale (*Megaptera novaeangliae*), (E) North Pacific right whale (*Eubalaena japonica*), (E) Sperm whale (*Physeter macrocephalus*), (T) Steller's Eider (*Polystica stelleri*), and the (E) Short-tailed albatross (*Phoebastria albatrus*).

We have determined the described activity would have no effect on (T) Steller's Eider (*Polystica stelleri*) or (E) Short-tailed albatross (*Phoebastria albatrus*), and would have no effect on any designated or proposed critical habitat, under the Endangered Species Act of 1973 (87 Stat. 844). Therefore, no consultation with the U.S. Fish and Wildlife Service is required. However, any comments they may have concerning endangered or threatened wildlife or plants or their critical habitat will be considered in our final assessment of the described work.

We have determined the described activity may affect the (T) Northern Sea Otter (*Enhydra lutris kenyoni*), (E) Steller Sea Lion (*Eumatopia jubatus*), (E) Humpback whale (*Megaptera novaeangliae*), (E) North Pacific right whale (*Eubalaena japonica*), (E) Sperm whale (*Physeter macrocephalus*), or their designated critical habitat. We will initiate the appropriate consultation procedures under section 7 of the Endangered Species Act with the U.S. Fish and Wildlife Service and the National Marine Fisheries Service. Any comments they may have concerning endangered or threatened wildlife or plants or their critical habitat will be considered in our final assessment of the described work.

ESSENTIAL FISH HABITAT: The Magnuson-Stevens Fishery Conservation and Management Act, as amended by the Sustainable Fisheries Act of 1996, requires all Federal agencies to consult with the NMFS on all actions, or proposed actions, permitted, funded, or undertaken by the agency, that may adversely affect Essential Fish Habitat (EFH).

The project area is within the known range of Flathead Sole (*Hippoglossoides elassodon*), Rock Sole (*Lepidopsetta bilineata*), Walleye Pollock (*Theragra chalcogramma*), Squid (*Architeuthis spp.*), Yellowfin Sole (*Limanda aspera*), Arrowtooth Flounder (*Atheresthes stomias*), Sculpin (*Cottoidea superfamily*), Pacific Cod (*Gadus macrocephalus*), Skate (*Amblyraja hyperborean*), the Chum salmon (*Oncorhynchus keta*), Pink salmon (*Oncorhynchus gorbuscha*), Coho salmon (*Oncorhynchus kisutch*), Sockeye salmon (*Oncorhynchus nerka*), and Chinook salmon (*Oncorhynchus tshawytscha*).

We have determined the described activity would not adversely affect EFH in the project area.

TRIBAL CONSULTATION: The Alaska District fully supports tribal self-governance and government-to-government relations between Federally recognized Tribes and the Federal government. Tribes with protected rights or resources that could be significantly affected by a proposed Federal action (e.g., a permit decision) have the right to consult with the Alaska District on a government-to-government basis. Views of each Tribe regarding protected rights and resources will be accorded due consideration in this process. This Public Notice serves as notification to the Tribes within the area potentially affected by the proposed work and invites their participation in the Federal decision-making process regarding the protected Tribal right or resource. Consultation may be initiated by the affected Tribe upon written request to the District Commander during the public comment period.

PUBLIC HEARING: Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for public hearings shall state, with particularity, reasons for holding a public hearing.

EVALUATION: The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts of the proposed activity and its intended use on the public interest. Evaluation of the probable impacts, which the proposed activity may have on the public interest, requires a careful weighing of all the factors that become relevant in each particular case. The benefits, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. The outcome of the general balancing process would determine whether to authorize a proposal, and if so, the conditions under which it will be allowed to occur. The decision should reflect the national concern for both protection and utilization of important resources. All factors, which may be relevant to the proposal, must be considered including the cumulative effects thereof. Among those are conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership, and, in general, the needs and welfare of the people. For activities involving 404 discharges, a permit will be denied if the discharge that would be authorized by such permit would not comply with the Environmental Protection Agency's 404(b)(1) guidelines. Subject to the preceding sentence and any other applicable guidelines or criteria (see Sections 320.2 and 320.3), a permit will be granted unless the District Commander determines that it would be contrary to the public interest.

The Corps of Engineers is soliciting comments from the public; Federal, State, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

AUTHORITY: This permit will be issued or denied under the following authorities:

(X) Perform work in or affecting navigable waters of the United States – Section 10 Rivers and Harbors Act 1899 (33 U.S.C. 403).

(X) Discharge dredged or fill material into waters of the United States – Section 404 Clean Water Act (33 U.S.C. 1344). Therefore, our public interest review will consider the guidelines set forth under Section 404(b) of the Clean Water Act (40 CFR 230).

NOTICE OF APPLICATION FOR STATE WATER QUALITY CERTIFICATION

Any applicant for a federal license or permit to conduct an activity that might result in a discharge into navigable waters, in accordance with Section 401 of the Clean Water Act of 1977 (PL95-217), also must apply for and obtain certification from the Alaska Department of Environmental Conservation that the discharge will comply with the Clean Water Act, the Alaska Water Quality Standards, and other applicable State laws. By agreement between the U.S. Army Corps of Engineers and the Department of Environmental Conservation, application for a Department of the Army permit to discharge dredged or fill material into navigable waters under Section 404 of the Clean Water Act also may serve as application for State Water Quality Certification.

Notice is hereby given that the application for a Department of the Army Permit described in the Corps of Engineers' Public Notice No. **POA-2007-870, Near Island Channel**, serves as application for State Water Quality Certification from the Department of Environmental Conservation.

After reviewing the application, the Department may certify there is reasonable assurance the activity, and any discharge that might result, will comply with the Clean Water Act, the Alaska Water Quality Standards, and other applicable State laws. The Department also may deny or waive certification.

Any person desiring to comment on the project, with respect to Water Quality Certification, may submit written comments to the address above by the expiration date of the Corps of Engineer's Public Notice.
