

**SPECIAL PUBLIC NOTICE  
ANNOUNCING THE RELEASE OF FORM ENG 6082 – NATIONWIDE PERMIT (NWP)  
PRE-CONSTRUCTION NOTIFICATION (PCN)**

On January 6, 2017, the U.S. Army Corps of Engineers (Corps) published the notice in the *Federal Register* announcing the re-issuance of all existing nationwide permits (NWPs), general conditions, and definitions with some modifications. The NWPs became effective on March 19, 2017, and will expire on March 18, 2022.

Certain NWPs require project proponents to notify Corps district engineers of their proposed activities prior to conducting the activities authorized by those NWPs, so that the district engineers can make case-specific determinations of NWP eligibility. The notification takes the form of a pre-construction notification (PCN). The purpose of a PCN is to give the district engineer an opportunity to review a proposed NWP activity to ensure that the proposed activity qualifies for NWP authorization. In most cases, the district engineer has 45 days after receipt of a complete PCN to determine whether the proposed activity qualifies for NWP authorization or requires another form of Corps authorization. More information on when an activity requires a PCN can be found in the Federal Register Notice:

<https://www.govinfo.gov/content/pkg/FR-2017-01-06/pdf/2016-31355.pdf>

Potential users of the NWPs should also check the Alaska District's website with the regional conditions for the NWPs, to determine if a PCN is required for a proposed activity. Those regional conditions are available at:

<https://www.poa.usace.army.mil/Portals/34/docs/regulatory/2017/Final2017RegionalConditionsMay17.pdf>.

More information about the Alaska District's Regulatory Program can be found at:

<https://www.poa.usace.army.mil/Missions/Regulatory.aspx>.

To assist applicants in providing complete information needed for NWP PCNs, this PCN application form was created and approved by the Office of Management and Budget in February 2019. The use of this form is strongly encouraged to assist Corps districts with a streamlined evaluation of an applicant's proposal. Submitting a completed PCN form is expected to reduce requests for additional information requests and should reduce the amount of time it takes the district engineer to conclude his or her review.

Instructions on how to complete the PCN application form and the PCN form can be found at:
